## Information Sheet for Models

ID: \_\_\_\_\_

For each category of the Contest below, please provide information about your modeling efforts as it relates to that category and your model. This is an opportunity to explain and expand on your model. Tell us what you have done.

### CATEGORY TYPE:

*Please check one.*

- Scratch-Built       Kit-Bashed       Craftsman Kit       Standard Kit

### CONSTRUCTION:

*Please check all that apply.*

- Wood       Plastic       Combination of different materials  
 Drew own plans       Used plans       Cut & fit materials       Made molds

*Please list any additional information that you would like us to know about constructing this model.*

A wood body was constructed to support printed car sides from the NMRA Bulletin in in 1972.

The underframe was milled from a single piece of wood on a radial arm saw.

*Please check all that apply.*

- Added extra details       Made own details       Over three extra details added  
 Changed trucks/wheels       Changed couplers

*Please list any additional information that we should know about what you did to detail this model*

Commercial castings were used for the hatches, brake cylinder and brake wheel. The brake wheel staff was cut from piano wire, all of the airline plumbing and levers were scratch built. The truss rods were made using monofilament all of the grab irons and steps were scratch built from wire and staples. Commercial siding was used for the car ends and the trim. The trucks and couplers are commercial items.

### FINISH AND LETTERING:

*Please check all that apply.*

- Weathered       Non-weathered       Spray painted       Brush painted  
 Put on decals       Photo reduction       Photo etching

*Please list any additional information that we should know about what you did to enhance the finish and lettering of this model.*

The NMRA printed cardstock sides in many of the December issues of the Monthly publication call the NMRA Bulletin. There were at least 7 or 8. This is the only one I have completed although I had planned to build several and have at least one more body shell constructed, with no details.

I followed the plans published in the first issue of the Bulletin containing the car sides. The car was probably constructed in the early 1980's.
